Subject: Bluegrass Concerns

Drawing: **Spec Section:** 329219
Cost Impact: None **Schedule Impact:** None

Request:

Date Required: 10/6/2008

Spec Section 329219 2.1 B b seed type for field "E" shows 80% bluegrass. The issues regarding elevation changes and such have us concerned that seeding blue grass this late may result in less than desired turf establishment. Blue grass under ideal temperatures takes close to three weeks to germinate. Perhaps an alternate seed mix should be considered to establish a better stand of grass.

Requested by: Letha Price
B.A. Construction Services LLC

Response:

The "SPORTS FIELD MIX" from Grasslands Equipment is an acceptable seed mix substitute for field "E". The seed mix identified contains 10% 98/85 Kentucky Bluegrass, 20% Exacta Perennial Rye, 40% Masterpiece Tall Fescue and 30% Rembrandt Tall Fescue. This is a lower cost seed mix than the mix specified in the contract documents.
